

ME English Center

Important Derivation

2024 Board Exam

Class 11th Physics

(According to New book and Model Paper)

If you are needed for other classes guess papers contact on this number 03408057780

___ Prepared by | Sir Faiz ur Rehman

Chapter 1 (Physics and Measurements)

Note : There is no derivation in this chapter

Chapter 2 (Kinematics)

1. Derivation of first equation of motion by graphical method
2. Derivation of second equation of motion by graphical method
3. Derivation of third equation of motion by graphical method

Chapter 3 (Dynamics)

1. Time taken by projectile to reach the maximum height
2. Total time of flight of projectile
3. Maximum height reached by the projectile
4. range of the projectile
5. Law of conservation of linear momentum for two colliding body
6. Elastic collision in One dimension drive velocity V_1 and V_2

Chapter 4 (Rational And Circular Motion)

1. Relation between linear and angular quantities
2. Derivation for centripetal acceleration
3. Centripetal acceleration caused by tension force
4. Drive the formula of orbital speed
5. Time period and orbital radius
6. Law of conservation of angular momentum

For getting all subject PDF notes and guess paper of classes 9 to 12, contact on WhatsApp number (0340 8057780) of ME English center

Prepared by: Sir Faiz ur Rehman

Chapter 5 (Work, Energy and Power)

1. Work done by variable force and its graphical calculation
2. Drive kinetic energy and potential energy formula
3. Work done in gravitational field is independent of path
4. **Absolute gravitational potential energy (Most important)**
5. Work energy theorem

Chapter 6 (Fluid Statics)

1. Drive the formula of upthrust $F = -\rho g V$.

Chapter 7 (Fluid Dynamics)

1. Drive and expression for terminal velocity of a spherical body
2. Equation of continuity

Chapter 8 (Electric Fields)

1. Electric field of point charge
2. Electric field at point due to two charges
3. Electric potential at point charge

Chapter 9 (Capacitors)

1. Capacitance of a parallel plate capacitor
2. Effect of dielectric material
3. Parallel combination of capacitor and series combination of capacitor
4. Charging and discharging of capacitor through a register.

Chapter 10 (DC Circuits)

1. Resistivity depends on temperature
2. Power dissipation in register

Chapter 11 (Oscillations)

1. Relation between linear and uniform circular motion
2. Period frequency and angular frequency
3. Potential energy of the oscillator

Chapter 12 (Acoustic)

1. Speed of sound in air
2. Newton defect and laplace correction
3. Formation of beat due to interference of non coherent sources
4. Source is moving toward the observer at rest
5. source is moving away from the observer at rest
6. observer is moving toward the source at rest
7. observer is moving away from the source address

Chapter 13 (Physical Optics)

1. Diffraction by a single slit
2. X-ray diffraction.

Chapter 14 (Communication)

No Derivation
